To Whom it may concern:

Re: Construction of Restaurants

Our Company owns and operates eight fast-food restaurants in the City of Montreal, under the trade name of "L'Habitant Steerburger".

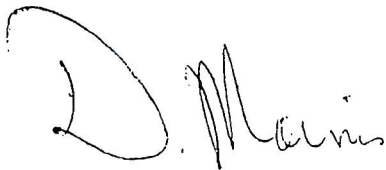

The construction of our restaurants is usually done by way of tender and a general contractor is chosen to take charge of all phases of the construction, installation and equipment.

Our equipment packages includes the cooking equipment, service equipment and seating.

Two of our locations were built by Mr. S. Tadros. The first one at: 1330 Mount Royal Street East for a contract of \$85,000.00 built in November 1973. The second job, situated at: 537 St. Catherine Street West, for a contract totalling \$140,000.00 built in July 1974.

Because restaurant construction is very complicated, it requires the skills of a highly qualified general contractor. Mr. Tadros answered those criteria, showing a tremendous amount of initiative and also cooperated in a most professional manner on the design of the restaurants with the architects.

We would not hesitate to have Mr. Tadros tender future installations and we recommend him for general construction on any scale.

By: Denis Mavrias, Pres.
